Harness The Power

Desktop Convenience for Added Flexibility

Imagine being able to scan paper documents and distribute electronic copies right from your desktop PC.

What if you could take a stack of invoices, enter key information about those invoices into a customized form, and then save both the form and paper invoices to your database?

Picture converting any file into a Microsoft Word or searchable PDF faster than it takes your morning coffee to cool. With QuickCapture Desktop, you'll be able to do all of that, and much more.

- Provides scanning solutions for TWAIN-enabled PC scanners and MFPs
- Scans to databases, secure FTP sites, network folders, email, fax servers, and printers
- Scans, indexes, previews, and archives paper documents into over 50 document management systems (DMS)
- Supports username and password authentication for document audit-trails
- Requires minimal user training

Scan, Index and Preview Documents

QuickCapture Desktop works with TWAIN enabled PC scanners and MFPs to scan, view, index, and distribute paper documents to electronic workflows.

Built on the award-winning AUTOSTORE content capture platform, and utilizing many of its processing features, QuickCapture Desktop accesses a rich set of AUTOSTORE workflows to securely send scanned documents to fax servers, email, folders, secure FTP sites, printers, and document management systems such as Microsoft SharePoint, FileNet, Documentum, and Interwoven.

Fast and Easy Data Retrieval

Out-of-sight, out-of-mind is not necessarily what you want from your scanned documents, so QuickCapture Desktop has a solution: Index documents using customizable indexing forms - fonts, colors, buttons, and images. Or, choose a form from an existing web page, and QuickCapture Desktop will literally point to that form so you can use it exactly as it appears. Whichever way you choose, QuickCapture Desktop lets you index documents for archival to a repository, and it quickly and easily retrieves the data when you need it.

Eliminate Errors & Do-Overs With a Powerful Desktop Capture Solution

Raising the Bar

- Distribute and share scanned documents directly from your workplace
- Increase efficiency and job satisfaction
- Reduce document loss & improve security by capturing documents at their source
- One-stop solution that integrates to business applications and DMS
- Affordable for even small businesses

For Corporations:

- Reduces costs by capturing documents at their source
- Manages risks through document tracking
- Leverages existing TWAIN-enabled PC scanners and MFPs
- Reduces document processing time
- Increases efficiency and job satisfaction

For End Users:

- Minimal training
- Easy-to-read screen
- One-touch editing
- View, correct and archive documents directly from PC scanner
- Convert paper documents to searchable PDFs
- Scan to fax, network folders, email, desktop

For IT Administrators:

- Easy to install and setup
- Centralized management
- Minimal support required
- Efficient use of the network
- Load balancing and clustering
- Custom VB scripting

Key Features

Multi-page thumbnail previews

Previewing a large scanned document can be time-consuming when your only option is to page up or page down - one page at a time. With Desktop you've got the flexibility to view document pages individually, in multiple- page batches, or as a full-page or thumbnail image – making any needed corrections as you go

Two-in-One Technology

QuickCapture Desktop runs on the AutoStore platform. This means that the unique features of QuickCapture Desktop are combined with the powerful, full-service, document processing and routing capabilities of AutoStore, including: data validation, image processing, barcode recognition, automatic email notifications, VB scripting - and more.

Efficient use of the network

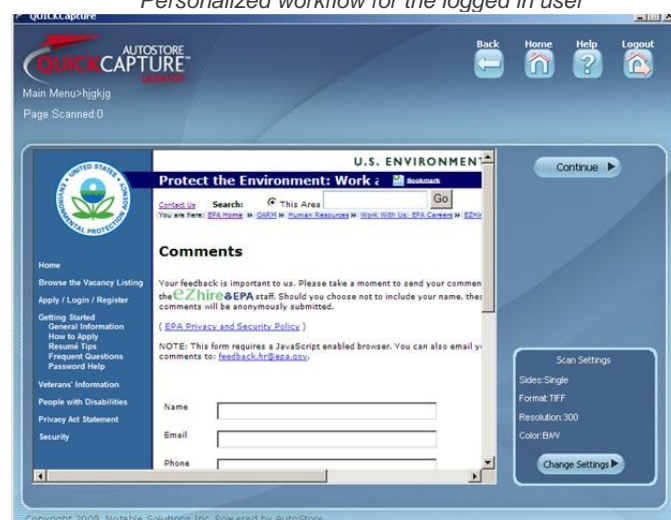

All image enhancements are done locally. This means that every time an image is displayed, rotated, zoomed or scrolled – network traffic is not impacted. Other scanning solutions use valuable server space to generate their images, which cause network servers to slow to a crawl when large documents are scanned and viewed.

System Requirements:

- Microsoft Windows Vista/ XP with SP2 (or higher), Windows 2000 with SP4 (or higher)
- Intel Pentium based PC or equivalent; 800 MHz processor for Windows Vista; 300 MHz or higher processor for Windows XP and Windows 2000
- 512 MB RAM recommended for Windows Vista; 256 MB RAM or higher recommended for Windows XP and Windows 2000
- 320 MB free hard disk space for the application files and working space during installation
- Requires installation of AutoStore Express, AutoStore or SMARTickets.

Personalized workflow for the logged in user

Example of a web indexing form. Simply enter the required document index data and scan. The document is processed and archived by AutoStore along with index data that is entered on the above web indexing form
