

BizCardReader 901 Card Scanner

Hi-Speed Simplex Card Scanner

Our scanners are specially designed for handling thick cards which are often difficult for other card scanners.

- ✓ ***The fastest and most reliable card scanner available — 2 seconds per card at 300 dpi resolution in full color!***

The BizCardReader 901 features an oversized high-traction input roller for smooth feeding of thick laminated medical and insurance cards, plastic embossed cards, and driver licenses.

Vertical Mount Scanner

The scanner can be used horizontally or vertically. When mounted vertically, the scanner has 2 distinct advantages.

Reduced Wrist Strain

Ergonomically, the vertical card insertion method is superior to horizontal card insertion because it reduces wrist strain. When scanning for extended periods, the vertical mount method is preferred.

Small Footprint

The small footprint of the vertical mount scanner saves a significant amount of desk space. The compact footprint is at least 40% smaller than horizontal scanners, and fits easily into a small open space.

Features

- Hi-Speed USB 2.0 interface
- Scan Speed: Approx. 2 sec. per card at 300 dpi, 24 bit color.
- Resolution: 100-600 dpi color
