

Burroughs EF 675 Serial

Burroughs
Payment Systems

EF675 – This is ideal where counter space is limited, but peak performance and flexibility is needed. Like the EF375, this unit prints slips, receipts and validations. In addition, the EF675 includes a single-feed MICR read feature.

All printer styles include a 1-year warranty from the date of shipment. Default warranty service is based on the Depot Repair mail in service level.

Designed to withstand the rigors of high transaction environments, Burroughs Payment Systems teller printers are built with the highest quality engineering and most rugged design of any printer in its class so customers can be confident that their hardware investment will be protected for years to come. Leveraging their expertise in check imaging, the receipt printer product line includes 2 styles featuring MICR check reading with 99.9% accuracy. Everything enterprises need to help them speed transactions and increase customer satisfaction at the point of transaction.
