Fast, easy scanning. Efficient document management.

Offering world-class performance for fast-paced businesses, the high-speed WorkForce DS-760 document scanner was designed for easy operation in heavy-use environments. Speeding through scans up to 45 ppm[1], it also features auto paper size detection and dynamic skew correction to prevent paper jams and avoid downtime. A robust and reliable workhorse, the DS-760 includes an 80-page ADF and a high daily duty cycle. TWAIN and ISIS compatibility make it ideal for use with existing professional document management systems. And, advanced image adjustments make getting sharp scans simple. The DS-760 even scans directly to popular cloud services[2]. It's the efficient way to scan critical documents and get them to their destination.

Scan to the cloud

Scan directly to the cloud[2]

The WorkForce DS-760 scans directly to popular cloud services[2]. Just install the included software on your PC and you're ready to get started. Scan and send data wherever it needs to be.

Advanced paper feed technology

Tackle any task with little to no downtime. Dynamic skew correction and multi-roller paper feed play a vital role by detecting misfeeds and correcting the angle at which the paper enters the scanner. Double-feed detection helps to eliminate paper jams. And, auto size detection makes it easy to scan multiple sizes in a single stack.

A3 Document

Scan oversized documents in one pass

Manage critical documents

Scan directly to popular cloud services[2]. Scan to email, an FTP server or any folder on your PC. The WorkForce DS-760 supports ISIS and TWAIN drivers. And, it includes OCR software for creating searchable PDFs or scanning directly to Word and Excel® files.

Color Enhance

Color Enhance allows users to select and enhance a color from the RGB color channel when scanning in black-and-white. This can help bring out a particular element that might not otherwise show up clearly in a black-and-white scan, such as a signature made with a light-blue pen.

Color Dropout

Color Dropout allows users to remove a color from the RGB color channel — a color that might cause noise or other image issues during a document scan. For example, a user scanning an invoice printed on pink paper could use "Color Dropout: Red" to ignore all red elements and pull out the crisp black text.
