Kodak

i5000V Series Scanners

Value. Volume. Vision.

Beyond smart lies brilliant: **Kodak** i5000V Scanners

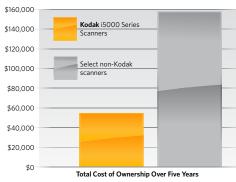

These scanners deliver a revolution in document imaging intelligence, offering advances in value, volume and vision. Get the savings, smarts and speed you need for your enterprise with **Kodak** i5000V Series Scanners with **Kofax VRS** Professional software

Best-in-class total cost of ownership/performance

- Process and manage more data per dollar than select competitors
- Over five years, compared to select non-Kodak scanners:
 - —Save up to \$100,000 on TCO*
 - —Save up to \$46,000 on consumables alone**

TCO includes list price, service cost, consumables, and additional image processing costs.

Give your documents the intelligence they deserve

Greatly increase processing volumes and accuracy to make informed decisions faster. Speed business processes.

Deliver better customer service. It's intelligence and power for your documents and enterprise, designed for less human interaction from feeding...through imaging...to stacking.

- > i5200V Scanner—up to 140 ppm
- > i5600V Scanner—up to 170 ppm

Gain even more speed without additional hardware purchases

- > Field upgradeable versatility and savings
- > Transform a **Kodak** i5200V Scanner to **Kodak** i5600V specs and performance as your needs and volumes grow

Single component, touch screen panel efficiency

- Make repeated and complex functions one-button-easy
- > Simplify tasks according to common job orders with programmable function keys
- Minimize human interaction and time expended
- > Improve accuracy and processing times
- > Wide-angle viewing with two ergonomically correct positions
- > Vibrant, full-color touch screen

Smart Scenarios www.UniLinkinc.com • 800.666.2980 • Sales@UniLinkinc.com

Kodak created i5000V Series Scanners to triumph over the many processing challenges faced by digital mailrooms, multinational financial and insurance service firms, manufacturing organizations, government entities, and others that handle huge volumes of documents containing diverse mixes of information. Here's how i5000V Scanners are tackling these challenges in the real world.

Controlled stacking, multi-feed detection and 750-sheet feeder capacity slashes paper handling time for financial institution

Situation:

- Financial services firm handles 200,000+ loans, receiving more than a half million documents per month that require data extraction
- Compound documents cause multi-feed problems
- Condition of original documents varies widely
- All documents must be handled in defined timeframe to prevent backlogs and enhance customer service

Solution:

- Controlled stacking with the Kodak i5200V Scanner allows checks to be mixed in with other documents of varying sizes and weights
- Five programmable multi-feed sensors provide greater detection accuracy

- Outer multi-feed sensors enabled for smooth processing of envelopes, while catching any landscape/ A4-size document multi-feeds
- Increased feeder capacity reduces cycle time

Results:

- Account numbers captured cleanly with outstanding data integrity
- Text rendered more legibly, including account numbers that will be sent for validation
- Image quality enhanced automatically even on light original documents—with
 VRS image processing features enabled
- Original document order within batches preserved, saving many hours formerly spent on reordering

Scanner intelligence enhances productivity, operational efficiency and protects against legal issues for service bureau

Situation:

- Variety of customers, all with widely varying requirements
- Many staffers spending excessive time on job setup and testing prior to revenue-bearing production
- Operators require retraining for new jobs
- Documents must be scanned at 300 dpi and returned in exact order of receipt for legal reasons
- Financial penalties can apply if performance levels are not met

Solution:

- Kodak i5600V Scanner greatly reduces document handling time through problem-free feeding and controlled stacking
- Programmable operator control panel permits faster setup
- Programmable multi-feed sensors cover a wider array of document types and sizes
- 750-sheet feeder capacity boosts productivity

Results:

- No worries about mixing diverse document sizes and weights
- Reduced operator training
- Scanning performance greatly lessened risk of financial penalties due to missed scans and other performance criteria

Onboard Kofax VirtualReScan Professional software

VRS Professional software is integrated into the hardware of each **Kodak** i5000V Series Scanner, so you enjoy all the image enhancement and error resolution functionality **VRS** delivers without paying any additional premium.

Advanced color management, image clarity, precise image cropping, auto color detection, and intelligent blank page detection are just a few of the benefits included with onboard **VRS** and your i5000V Series Scanner.
