

Shear Tech MJ-1500 Mixed Documents / Check / Paper Jogger

The MJ-1500 is a small, table-top, automatic multi-document paper jogger. Now with reduced noise level (<53 dbA), increased stability and the same excellent performance.

The MJ-1500 jogger has derived from the well-regarded check jogger MJ-1000. Extended tray of the MJ-1500 accepts wide range of documents, from 2" x 4" up to 8.5" x 11.0" documents. Jogging a batch of documents for a few seconds in the **paper jogger**, perfectly aligns bottom and side edges of checks and documents, reducing chances of jamming and double-feeding. We designed our **MJ-1500 Check Jogger** specifically for Check-21 heading retailers, smaller banks, branches, community banks, and credit unions as well as mail rooms, post offices and print shops.

Who should use the MJ-1500 Jogger?

Anyone who uses automatic mixed documents (check/paper) Scanners, such as BUIC Multidoc, and check scanners, such as Canon CR-180, Digital Check TellerScan family, and Unisys MyVision X.

Features:

- **Efficient and Reliable.** Takes less than 8 seconds to reliably jog a batch of checks/documents.
- **Quiet operation.** Noise level is less than 53 dbA.
- Handles wide range of documents, from 2" x 4" up to 8.5" x 11.0" documents.
