MICR MX-3 Series Encoder

Encoding exception items at the point-of-entry saves time and money.

MAVERICK International

The MX-3's state-of-the-art circuitry, which includes USB2 communications and an ARM processor, allows you to encode twice as fast as a MICR III.

This compact robust encoder will meet your requirements for an accurate and reliable MICR exception item encoder. Simply key the information, drop the document, and the MX-3 will encode the MICR code-line exactly to ANSI specification. Program functions directly through the keyboard, snap in a ribbon, and begin encoding with minimal operator training.

Additional Features:

- Fixed & Variable Fields
- Auto Incrementing Fields
- Exception Field Encode
- Full Field Encode
- Repeat Encode
- Acct. # with CDV/CDG option
- ABA # with CDV/CDG option
- USB2 Download Capability

The space saving MX-3 has a footprint about the size of a piece of paper and will allow you to improve customer service by encoding items at the branch level. By encoding documents such as lobby deposits, counter checks, bonds, and repairing items for reprocessing, the MX-3 will save valuable time and money by allowing you to present qualified items to the proof department.

With minimal space requirements, this MICR encoder provides the optimal cost effective solution for exception item encoding.

MX-3:

Encodes Single/Multipart Documents

8 Programmable Function Keys capable of 100 functions each

2-line x 20 character Backlit Display

Self-contained Ribbon Cartridge

Standard Document Auto Eject

Standard Document Catch Tray

Future Upgradeability

MICR MX-3 Series Encoder

The process of encoding exception items at the point-of-entry enables production oriented work groups such as proof and item processing departments to operate at peak efficiency. Items that cannot be posted as part of the normal financial presentment such as suspect items, signature verification, large dollar items, non-sufficient funds (NSF), and missing MICR data can be encoded with the MX-3 to fully qualify the exception item.

Standard Program Features:

The MX-3 is completely field programmable through the keyboard.

- On-board advanced diagnostics and test mode
- 8 programmable functions
- Each function key can be programmed to scroll up to 100 different fields CDV/CDG (each field)
- Auto-repeat encoding
- Auto Incrementing serial numbers
- Ribbon out detection
- Floating On-U's feature
- Field "look-up" feature
- Single pass, full field encoding
- Dog-ear detection
- Robust keyboard design
- Self calibrating Sensors

The MX-3 Exception Item Encoder provides full keyboard programmability for maximum flexibility. Eliminate cost and lost time associated with programming changes that can only be done at the factory. With state-of-the-art circuitry and a stout mechanical design, the MX-3 eliminates downtime. The MX-3 meets or exceeds the rigid ANSI MICR specification for MICR encoding and features a ribbon cartridge that is simple to change with absolutely no mess. This unit is lightweight, compact and is a perfect fit for a small work center.

ENCODER SPECIFICATIONS:

Speed:	45 dpm
Length:	13.25 inches (33.7 cm)
Width:	8.0 inches (20.32 cm)
Height:	3.5 inches (8.89 cm)
Display:	20 character, 2-line alphanumeric Backlit LCD
Weight:	4.25 pounds (1.93 kg)
Ribbon:	Average yield of 25,000 - 30,000 characters
Power:	120 VAC, wall mount transformer (or) 100-240 VAC, in-line desktop
Memory:	Non-Volatile, FLASH ROM
Encode Capability:	65 character/full field
Font:	E13B (other fonts available)
Options:	Coming Soon
