## **MICR MX-6 Series Encoder**

**Encoding exception items at the point-of-entry saves time and money.**

**MAVERICK** International

The Mx-6 's state-of-the-art circuitry, which includes USB2 communications and an ARM processor, allows you to encode twice as fast as a MICR VI and includes machine to machine cloning.

This compact robust encoder will meet your requirements for an accurate and reliable MICR exception item encoder. Simply key the information, drop the document, and the Mx-6 will encode the MICR code-line exactly to ANSI specification. Program functions directly through the keyboard, snap in a ribbon, and begin encoding with minimal operator training.

### **Additional Features:**

- Fixed & Variable Fields
- Auto Incrementing Fields
- Exception Field Encode
- Full Field Encode
- Repeat Encode
- Acct. # with CDV/CDG option
- ABA # with CDV/CDG option
- USB2 Download Capability
- Serial Communications

The space saving Mx-6 has a footprint about the size of a piece of paper and will allow you to improve customer service by encoding items at the branch level. By encoding documents such as lobby deposits, counter checks, bonds, and repairing items for reprocessing, the Mx-6 will save valuable time and money by allowing you to present qualified items to the proof department. With minimal space requirements, this MICR encoder provides the optimal cost effective solution for exception item encoding.

### **MX-6:**

**Encodes Single/Multipart Documents**

**20 Programmable Function Keys**

**2-line x 20 character Backlit Display**

**Self-contained Ribbon Cartridge**

**Standard Document Auto Eject**

**Standard Document Catch Tray**

**MICRease Application Programs**
