## Cordless & **Wireless** Mobile Color Scanner

The Freedom of True Mobility. If you have a mobile scanner, you're not truly mobile unless you have the freedom to connect to your mobile devices. And who wants to go looking for cables and adapters? Relax, you have found Mobility Air!

Now you can scan your photos, documents, receipts, plastic cards, nearly anything to PDF or JPG with a truly untethered scanner. Your scanned files are stored on any standard USB flash drive or SD memory card, but we didn't include just any SD memory card. Mobility Air comes with Eye-Fi®, a wireless SD memory card. Now you can scan to JPG and upload those scanned files **wirelessly** to your Mac® or Windows® computer, Android® phone or tablet, or Apple® iPhone®, iPad® or iPod® over your local Wi-Fi access point. You can even scan to the Cloud, to over 25 destinations that include Facebook, Evernote, Shutterfly and more.

### 4GB SD Eye-Fi Card + built-in WiFi (included)

- Instantly transfer scanned files to your Mac or Windows computer
- Upload directly to the Cloud, over 25 photo, social and productivity web sites
- Eye-Fi SD card becomes a hot spot in Direct Mode

### Mobility

- Scan directly to Apple iPhone, iPad, iPod, Android phones & tablets
- Android and iOS™ apps free to download
- Email or upload scans to Facebook, Evernote, Picasa, Flickr

### Functionality

- 300 dpi simplex scanning in color or black & white
- Scan to multi-page PDF and JPG files
- Rechargeable battery, 300 pages per charge

### Simplicity

- Cables, drivers and computer no longer needed
- Store scanned pages on SD card or USB flash drive
- AutoLaunch™ – scanning begins as soon as you insert your page

Scan documents, receipts, photos, business cards, plastic ID cards... anywhere!

# visioneer. mobility | AIR

## Scan and send over **Wi-Fi** to PC, Mac<sup>®</sup>, Android<sup>®</sup>, iOS<sup>™</sup> & the cloud

DocAir is the perfect mobile app for your Visioneer<sup>®</sup> Mobility Air scanner. DocAir pairs your Android phone/tablet or iOS iPhone<sup>®</sup>/iPad<sup>®</sup>/iPod touch<sup>®</sup> with the wireless SD scanning card that came with your Mobility Air scanner. The wireless scanner card can be configured to connect to any wireless 802.11 b/g/n access point. Once your wireless card and mobile device are on the same wireless network, the magic begins; your scanned JPG and PDF files are wirelessly transmitted directly to your mobile device. The DocAir app allows users to easily view or store images, share them by email, print them or send them to the cloud. If there is no wireless network available, the wireless scanner card can be configured in Direct Mode which means the card becomes its own hot spot and will still connect and transfer scanned files to your iOS device.

### Mobility Air Product Specifications
