

mi:Deal™

Check capture without limitations.

Panini mi:Deal is the practical, smart, and secure solution for cost effective and reliable check capture – in a wide range of application options – from the world's most trusted brand for check scanners.

Combining innovation and ease-of-use with API-free connectivity to RDC, POS, branch and mobility applications, mi:Deal offers the most reliable and economical capture of checks with comprehensive Check 21 compliance.

Practical. Smart. Secure.

Panini mi:Deal offers exceptional, state-of-the-art flexibility for deployment; easily integrating with a wide variety of physical and virtual environments through wired or wireless connectivity.

- **On-board intelligence** for MICR codeline and image handling.
- **Easily interfacing** with a range of different host devices including PCs, POS terminals, tablets and smartphones, regardless of the OS and with no need to use an API, thus virtually eliminating the extensive software integration required with traditional check scanners.
- **Wired (USB, Ethernet) or Wireless (WiFi) connectivity** options providing extraordinary application flexibility without compromising Check 21 compliance or security.
- **Compact and attractive design** suitable for any workspace.
- **Ergonomic horizontal check feeding** for the natural experience of a self-service device.
- **Straight paper path and “clam-shell” design** for easy removal of any foreign items.
- **Advanced MICR Plus® codeline reading technology** ensuring the highest level of transaction accuracy.
- **Dual-sided image capture** with real-time delivery of compressed and cropped front and rear images.
- **Front franking** of items to prevent re-presentment and fraud.

Panini mi:Deal™ enables cost effective and highly efficient check capture in a variety of applications with minimal integration effort.
