

## star FVP-10

## Banking Solution: FVP-10 & Check Scanner

Star Micronics has the winning combination for the Banking Industry, integrating both receipt printer and check scanning in one very small footprint conserving valuable teller counter space. Designed specifically for use in bank and credit union branches, the FVP-10 platform-top cover accessory holds check scanner devices securely in place atop the printer. This allows financial institutions to use their FVP-10 printers to generate customer receipts for check deposits while simultaneously scanning those same checks with check transport equipment - *all in a single step rather than two consecutive steps*. Current Platform Accessories available for Canon, CTS and Panini brand check scanners, additional brands in development.

FVP-10 offers end-users an array of attractive benefits and printer reliability customers have come to expect from Star Micronics, including a convenient front-loading configuration, easy paper loading, onboard USB, Logo Storage and receipt compression for paper-savings. It generates receipts at an ultra-high print speed of 250mm per second and can support up to seven pounds of accessories on its platform top.

- Smallest Footprint - (9"(L) X 5.7"(W) X 4.5"(H)
- Designed to Support Multiple Check Scanners – Canon, CTS, Panini & more!
- Multiple Interface Options for Communication - USB Standard IF + (Parallel, Serial, Powered USB, & Ethernet IF)
- Voice Communication for Printer Function
- Effortless Paper Loading – Just “Drop In & Print”
